SHOWER CUBICLE SAFETY & HYGIENIC

Durable and High-Quality Material: Our Durable Public Commercial Washroom Shower Cubicles are crafted with **STRONG** Compact laminate panel, ensuring a long-lasting and resistant structure that withstands heavy use.

GRAPHICAL PRESENTATION

COMPONENTS IN DETAIL

- A. 12mm DIVISION PANEL
- B. 12mm DOOR PANEL
- C. 12mm PILASTER PANEL
- D. 12mm BACK PANEL
- E. ALUMINIUM HEADRAIL

- F. NYLON ADJUSTABLE FOOT
- G. NYLON ANGLE BRACKET
- H. NYLON CLOTH HOOK
- I. NYLON SELF-OPENING 15°HINGE
- J. NYLON SNIB INDICATOR W/ LOCK SET

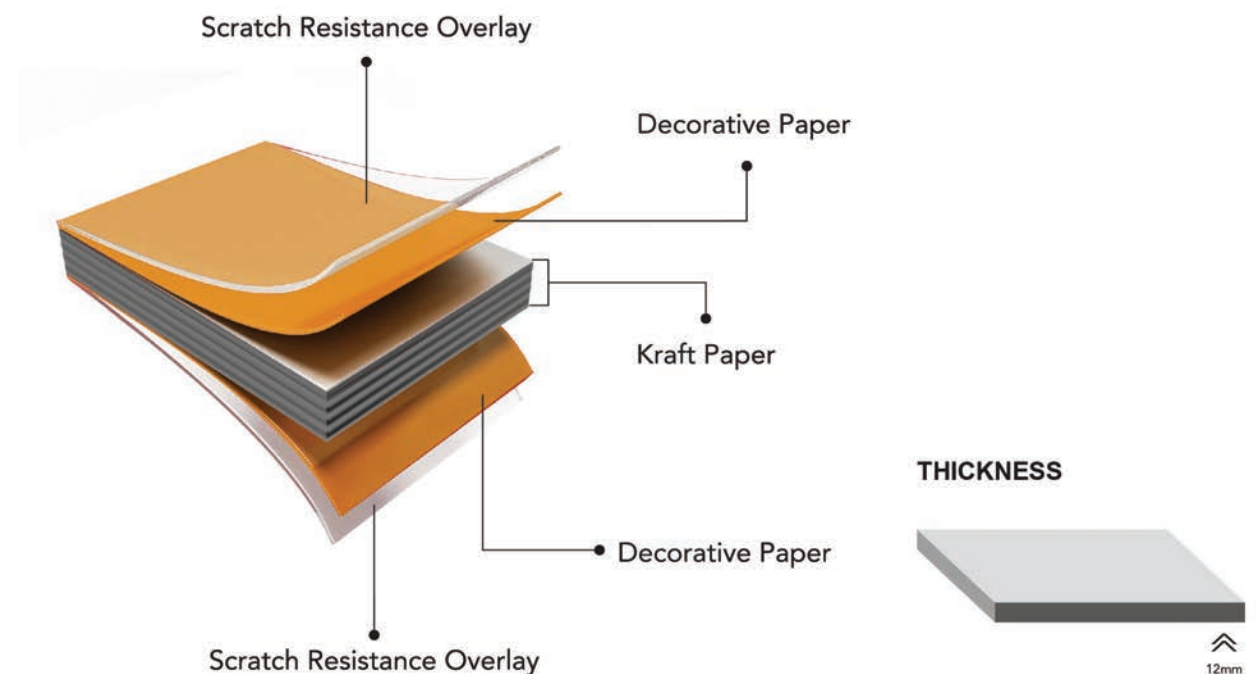

IMPACT AND SCRATCH RESISTANCE

Shower Cubicle Partitions are meticulously engineered and construct to withstand significant impacts, ensuring durability and **SAFETY** in high-traffic environments.

Our compact laminate board is constructed from multiple layers of high-quality kraft paper, reinforced by thermosetting resins under high pressure and temperature, with decorative paper on the surface. It is one kind of material that totally **water resistant, impact resistant, easy to clean,** and **durable.**

Features

Durability

High-pressure laminate is an indispensable material for high-quality toilet and shower partitions. Although Compact laminated panels aren't as flame-resistant as concrete or steel, they are still highly durable and they offer far more fire protection than traditional wood and drywall-constructed interior walls, or exterior vinyl applications.

Built to Last

Our Shower Partitions are built to last, protect privacy, and can be customized to meet the needs of your project. With non-porous surfaces that stand up to mold and mildew, these strong partitions not only look good, but will save you time and money on ongoing maintenance.

Privacy Partitions You'll Love

Our Shower Partitions are designed to combat traditional problems associated with commercial washrooms and have all of the standard benefits of Laminated Surface.

Added Privacy

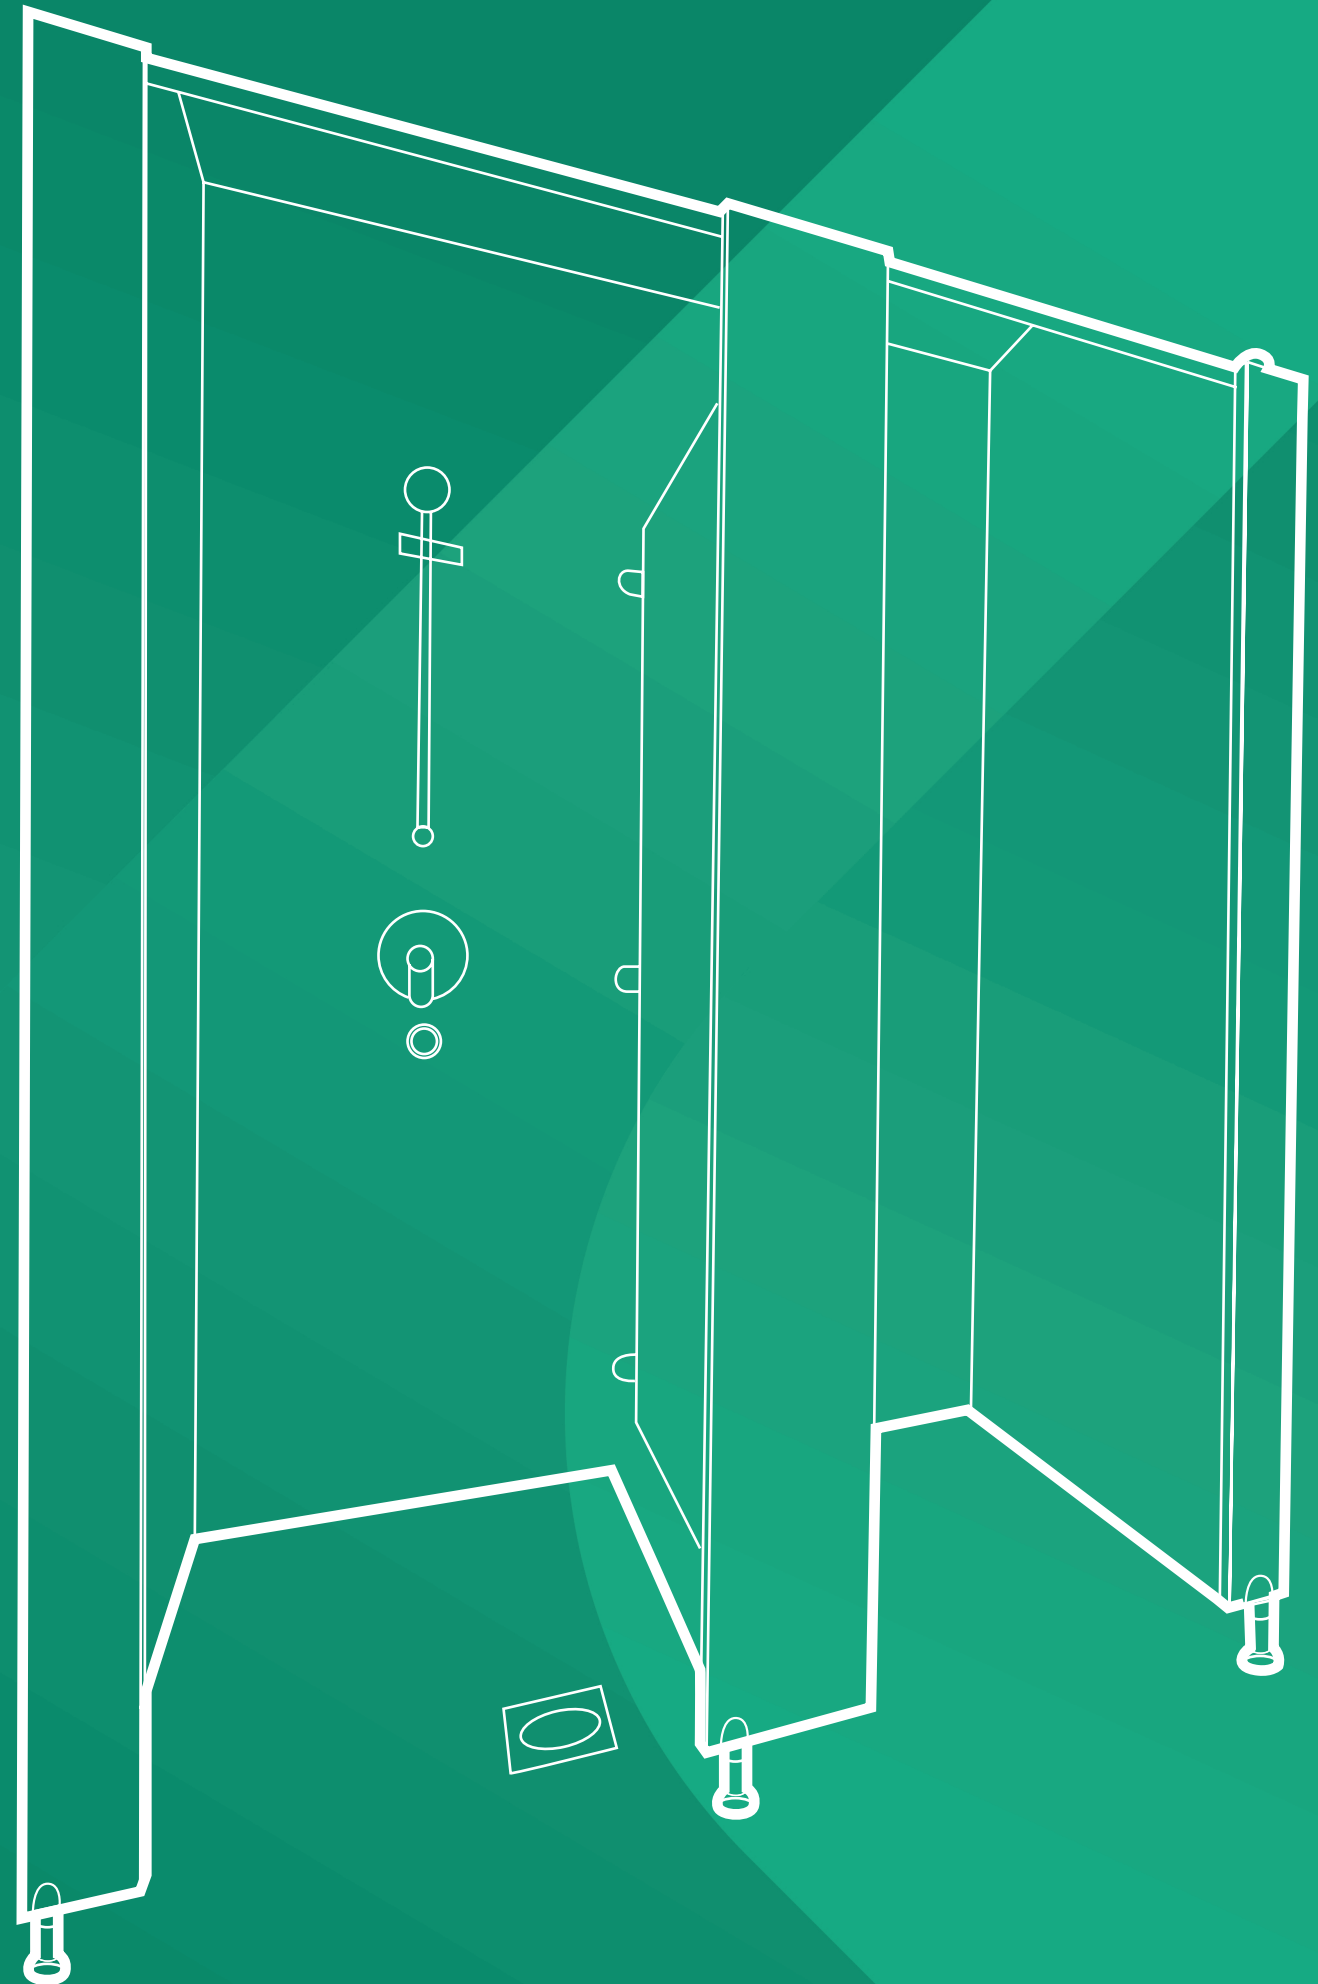

Larger doors, wall panels, continuous hardware and trim minimize sight lines to protect the privacy of your guests and allow them to feel comfortable in a vulnerable area.
